

Dear Jim, Keuch's 5/2 to you re our letter to Bell

5/4/77

This brush says much:

The crazies have given Bell his out;

The same bureaucrats still control the Justice Department;

They are not interested now in any fact about the King assassination.

Under these conditions I'd not bother to respond.

When I have it all put together will be time enough.

What I think is working now is what always does with the crazies active. What they say is being culled, collected and destroyed where it counts and in silence.

Once again it is all equated with the insane stuff Lane spouts and is responsible for. Now this includes the committee.

I do not see how Keuch gets involved in answering this because he has a DJ role with the House committee. We wrote about OPR, not the committee.

Keuch is one of those supervising non-compliance with FOIA/PA.

I'm not sure but I think he wrote some of their letters to Wes Whitten. If so we put them in the record in C.A75-1996 last September.

Well, we've done our part and if there had been any serious official intention the crazies ended it. Keuch says in writing is better?

That means a book - only.

Best,
